

WIRELESS SERVICES DIVISION

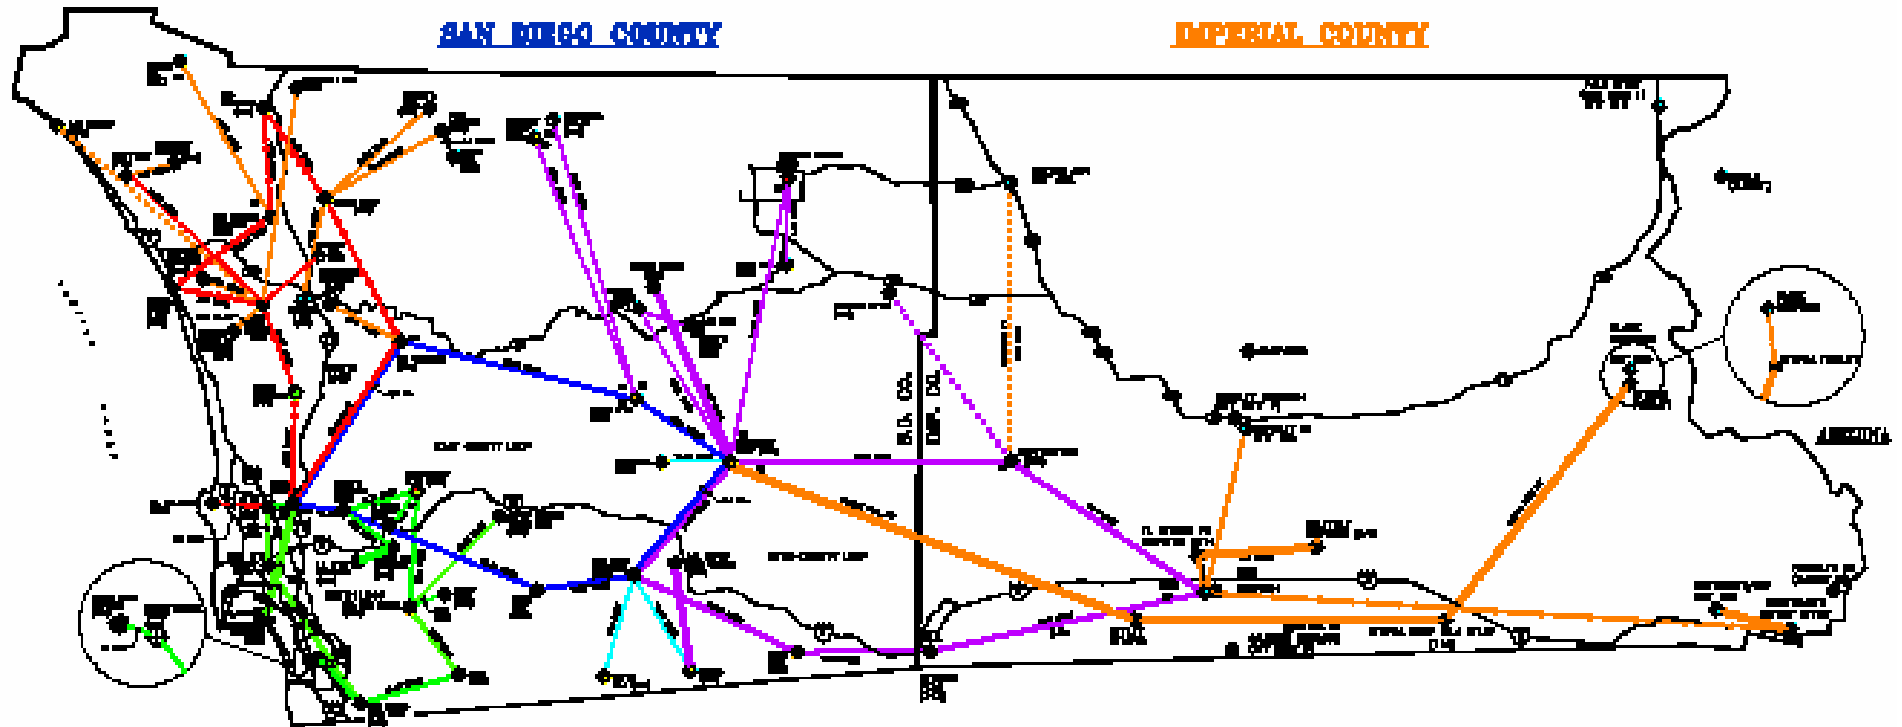

CONSOLIDATED WIRELESS WIDE AREA NETWORK PLAN

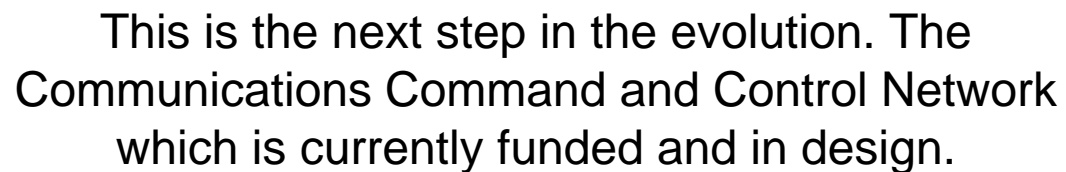

This is the vision. A trusted, wireless, redundant Public Safety network.

WIRELESS SERVICES DIVISION

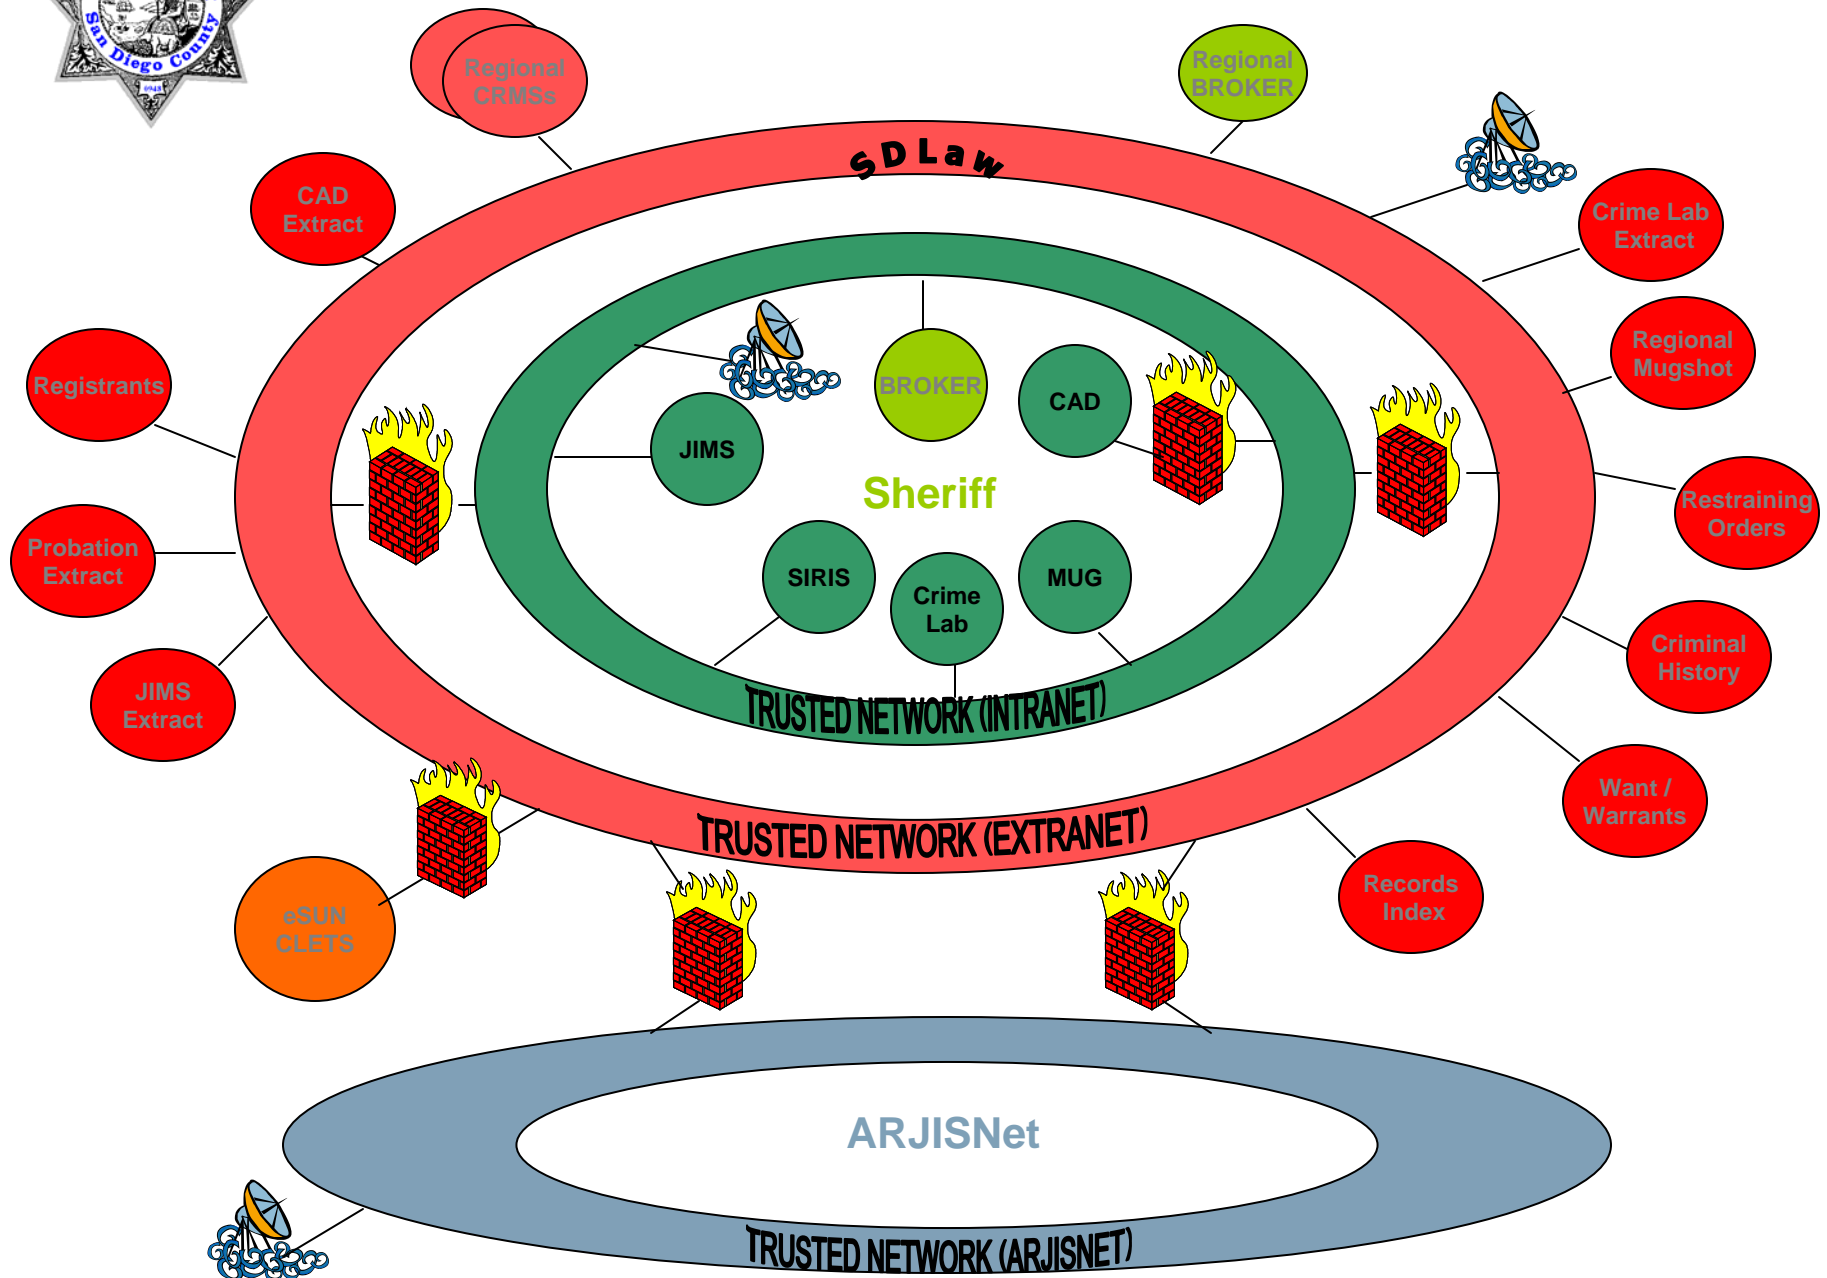

This is what we are building on. The San Diego-Imperial County Regional Communications System (RCS).

This is what we will do with it.

WIRELESS SERVICES DIVISION

- These concepts and the operational elements are designed and will be built based on lessons learned from the development and evolution of the High Performance Wireless Research and Education Network (HPWREN).
- Currently HPWREN is co-located on two RCS sites.
- HPWREN provides connectivity to a Sheriff's wireless test bed site at the 22nd District Agricultural Association venue in Del Mar.
